

Benefit from your Risk Assessment

- Manage GLBA, Red Flags and vendors from one application
- Calculate the highest need/best value for your security updates
- Demonstrate risk and return to your board in a clear, graphic format
- Protect your data and your reputation
- Be sure you'll comply at exam time

Risk Assessments, Simplified

Organize and Analyze

For too long, risk assessments have been a time-consuming, confusing job that created little value for your institution. Now there's Scout™, a web-based application that simplifies the risk assessment process. Scout organizes your risk environment and produces meaningful intelligence you can actually use.

Developed by a former regulator and banking executive, Scout provides everything you need to track and interpret your information security risks.

Gramm-Leach-Bliley Act

- View and manage by institution, branch and department
- Receive automated audit review schedules
- Reduce time and stress during IT exams

Red Flags

- Record Red Flags and track ID theft events
- Spot trends and identify risk areas

Vendor Management

- Rank vendor access/risk
- Schedule due diligence
- Attach supporting documents

Scout™ Advantages

Easy to Use

- Intuitive user interface
- Navigate and drill down through clickable reports

Logical Reporting

- Eliminate multiple spreadsheets and isolated reports
- 3-D database shows multiple risk/control associations

ROI Scenarios

- Highlight the best value security investments
- Demonstrate how revisions would impact the risk environment
- Track current and planned mitigation activity

Strategic Support

- Follow the step-by-step guide to risk assessment
- Reduce staff time documenting and maintaining assessments
- Prioritize projects with the biggest impact

Web Based Application

- No server or other hardware required
- No licensing, compatibility or maintenance issues
- Secure, remote access from any internet connection
- Information encrypted and backed up to redundant data centers

LOCKNET Support

- Speak to our compliance advisors for on-demand assistance
