

Real-time Risk Management Dashboards.

Stop using yesterday's tools to meet today's risk management challenges

Let's face it. Risk assessments are often a tedious and cumbersome job that make compliance officers miserable. Too often, they provide little insight for management and boards into the risks your institution faces and the steps you're taking to mitigate them.

The reason boils down to one word—spreadsheets. They are simply no way to assess and manage risk and data security issues. In fact, they're a 20th-century tool for a 21st-century challenge.

Get serious. Get Scout.

Scout is a 21st-century tool for a 21st-century challenge. It's an interactive, web-based dashboard that manages your information security and risk environments in real time. Scout takes the confusion and frustration out of risk management—and delivers far superior results for your institution. Scout is a ridiculously easy-to-use yet surprisingly powerful tool—people actually enjoy using it!

Scout makes risk management a breeze:

- All the latest FFIEC standards and best practices are built right into Scout—so risk management is logical and efficient, and your program is always up to date.
- Scout's fully integrated real-time risk management dashboard replaces all of your cumbersome spreadsheets, dramatically slashing the time and effort needed to manage your risks.
- Long, painful regulatory exams are a thing of the past because Scout ensures that you are prepared and all relevant information is easy to find and understand.
- Scout allows you to create easy-to-read, customized reports with intuitive, color-coded graphs and lists.
- Scout's all-inclusive, predictable pricing makes it easy to afford.

A product of

Scout™ Features and Benefits

Real value from risk assessments

- Eliminate tedious and confusing spreadsheets
- Bring continuity and consistency to risk assessments
- Show comprehensive, top-level views and extensive drill-down views
- Manage multiple risk assessments for multiple branches

Gramm Leach Bliley Act

- View and manage by holding company, institution, branch and department
- Receive automated audit review schedules and reminders
- Reduce time and stress during risk assessments and even exam time

Red Flags

- Record Red Flags and track ID theft events
- Spot trends and identify risk areas
- Produce four major required annual reports

Vendor management

- Rank vendor criticality, confidentiality and performance
- Schedule and be reminded of due diligence reviews
- Attach supporting documents

With Scout, performing the risk assessment was easy and intuitive. In fact, for the first time we truly understood these processes and why they needed to be done. And did I mention that I don't have a pile of useless spreadsheets anymore?

– Kristina Quint, Systems Administrator at Farmers and Merchants Institution and Trust, Burlington, Iowa
